The Trerice **TR890 Series** Electronic PID Controller is designed for use on applications where large load changes are expected, or the need for extreme accuracy and fast response time exists. With full auto-tune capabilities and a large selection of available inputs, the TR890 Series is ideally suited for use with a Trerice Control Valve.

**Use of a Trerice No. TA987 Air Filter/Regulator is recommended for filtering and regulating the pressure of plant compressed air and delivering clean, dry air at the proper pressure to pneumatic control devices.**
